### Taxi 07 : Design Trust for Public Space

Taxi 07, a project of the Design Trust for Public Space, aims to inject sustainable mobility, access for all, and good design into the iconic yellow cab and the broader taxi system - just in time for the 100th anniversary of the modern-day taxi in New York City.

The project will culminate in an exhibition of innovative taxi prototypes and related displays at the 2007 New York International Auto Show in April.

The objectives of Taxi 07 are to foster design innovation, celebrate the taxi's centennial, and develop a taxi system strategic plan in partnership with the New York City Taxi & Limousine Commission.
